

California Association of Administrators of State and Federal Education Programs (CAASFEP)

Presents

New Directors' Workshop (And not-so-new Directors too!)

Gain essential information on how to successfully lead state and federal programs from two highly-regarded experts. During this workshop, you will learn about the following: school and district-level planning requirements, accountability systems, ESSA reauthorization, Local Control Funding Formula and Local Control Accountability Plan, state and federal audit and compliance monitoring processes, fiscal and data management associated with state and federal programs, equitable services requirements for serving students in eligible private schools with federal program funds, and state and federal parent engagement requirements. Participants will receive a comprehensive handbook chock-full of information and resources supporting each of the topics addressed in the workshop.

Learn how to not just survive but thrive in your new role! Don't be surprised if you find yourself sitting by a not-so-new director....the information is that good!
